

Feedback on the Course

"Student Learning Experience Survey"

IB 514: Scientific Writing

Please provide feedback!

Feedback on
the Course

Help me improve future offerings:

- Which topics did you find most/least useful/effective?
- Are there topics you wish had been covered (or in greater depth)?
- Should there be more discussion of AI tools (effective uses, ethics)?
- Which activities did you find most/least useful/effective?
- Should I include more activities, more writing time, more lecture/discussion?
- How might I motivate more discussion in class?
- Should accountabilibuddies be continued/improved?
- Add more individual feedback on writing from me, peers, both?
- Would accountability requirements (e.g., graded exercises, manuscript benchmarks) have been a useful motivator?

Just as important: 100% response rate (even if you have no feedback)
